THE INTERSECTION OF
Interconnection
Increasingly complex digital business demands require infrastructure performance and flexibility. Whether you need to digitize customer experience, optimize performance or scale on-demand, we deliver purpose-built data centers and a highly interconnected ecosystem that holistically ensures you are future-ready and able to grow your business.

**WHERE YOU PUT YOUR INFRASTRUCTURE MATTERS**

CoreSite, an American Tower Company, serves as the ideal interconnection hub to build and deploy a hybrid IT strategy to monetize and future-proof your business.

Our interoperable platform centralizes direct access to partners in your digital ecosystem. We are the IT nexus where top cloud providers, service integrators, networks and fellow enterprises interoperate and collaborate to accelerate business initiatives. When you are looking for a cloud assessment, access or services – or data storage and analytics, management tools, colocation and security services or real-time collaboration – look to CoreSite to provide the native digital supply chain needed to ensure your business thrives.

**CORESITE COLOCATION DATA CENTERS ENABLE BUSINESSES TO**

- Meet Compliance Requirements

WHY CORESITE?

We are building the digital infrastructure for tomorrow, today, as a subsidiary of American Tower. The combined assets of the companies – CoreSite’s data centers, decades of operational experience and unique interconnection platform and American Tower’s domestic and international real estate portfolio – establishes a differentiated foundation for building the interconnection fabric of the future and accelerating wireline and wireless convergence. Additional reasons are rooted in our demonstrated ability to deliver a significant return on investment:

- **Save up to 60%** on CoreSite cloud connectivity compared to traditional telco and SDN offerings*
- **Save up to 50%** by connecting to 435+ network service providers at CoreSite*
- **Cut data replication costs by as much as 70%** using direct interconnection and eliminate data egress costs when restoring data from certain local cloud availability zones*
