

Enterprise-Class, Fully Optimized Internet Service

Blended IP – Up to 10Gbps Now Available

CoreSite's Blended IP product is an ideal solution for scalable, fully optimized internet service. For businesses that require production-level internet, our Blended IP offers 100% SLA uptime that is achieved through a blend of Tier-1 carriers and fully redundant hand-offs. With quick setup and flexible bandwidth options, Blended IP makes sense for almost every use case and provides expanded bandwidth management and public cloud connectivity.

WHAT IS IT?

CoreSite's Blended IP service is designed to make it easier for enterprises to manage their IT solutions through a single billing model. Dedicated internet service is often needed with a data center deployment. Blended IP combines multiple upstream ISP providers and local internet exchanges (including the CoreSite Any2Exchange®) to get you the fastest data transfer vs. a single internet carrier. We offer single connections for traditional connectivity or fully redundant connections for mission-critical applications, all with fixed monthly fees and service rates up to the committed information rate of 10Mbps, 50Mbps, 100Mbps, 300Mbps, 500Mbps or 1Gbps service options on 1G ports or 2.5Gbps, 5Gbps, 7.5Gbps or full 10Gbps service options on 10G port. Additionally, our Blended IP service includes static IPv4 and IPv6 addresses and supports BGP routing.

BENEFITS

- ✓ Streamlined management – one combined bill for internet and your data center solutions
- ✓ Improved performance – better redundancy, dedicated bandwidth, ultra-low latency
- ✓ Quick set up – 72-hour activation interval
- ✓ Flexible – different options for connectivity, bandwidth and routing
- ✓ Reliable – SLA-backed service
- ✓ Low-latency Tier-1 ecosystem
